DOCdata N.V. supplies passport systems to Switzerland and Ireland and to security printers François Charles Oberthur Fiduciaire in France and De La Rue Global Services in the United Kingdom.

Industrial Automation Integrators (IAI) B.V. in Veldhoven, a subsidiary of DOCdata N.V. in Waalwijk, will supply Laser-Perforation-Systems for the application of the patented security feature ImagePerf/TLI[®] to the Swiss and Irish passports. IAI will also supply systems for the application of NumberPerf[®] in passports to leading security printers François Charles Oberthur Fiduciaire in France and De La Rue Global Services in the United Kingdom.

In Switzerland the existing production capacity needs to be extended due to fact that the number of passport applications by the public exceeds the anticipated number. As before, the equipment will be supplied via main contractor and security printer Orell Füssli in Zürich to the Bundesamt für Bauten und Logistik in Bern.

In Ireland, the Irish Passport Office has decided to implement the security feature ImagePerf/TLI[®] in the future version of the Irish passport. For that, systems will be delivered via main contractor BearingPoint Ireland Ltd. in Dublin (formerly KPMG Consulting, Inc.) to production facilities of the Irish Passport Office in Dublin and Balbriggan.

After the implementation of IAI's ImagePerf[®] technology in Belgian, Dutch, Estonian and Swiss passports, this decision of the Irish authorities once again affirms the outstanding value attributed to IAI's ImagePerf[®] as a security feature.

Security printers François Charles Oberthur Fiduciaire in Paris, France, and De La Rue Global Services in Basingstoke, UK, both supply passports to a large number of countries. In spite of fierce competition, both of them decided in favour of IAI systems for the application of NumberPerf[®]. For these printers of a variety of passports, the flexibility and versatility of IAI's equipment proved to be decisive.

All of the above systems will be delivered in the course of 2003. The orders represent a turnover of over € 4.7 million in total.

These orders clearly demonstrate IAI's steady growth in security printing where IAI offers systems for the application of security features to passports, identity cards, banknotes, and etcetera. IAI is honoured to be awarded these contracts of well-established parties in the security printing market.

- Industrial Automation Integrators (IAI) B.V., a subsidiary of DOCdata N.V., currently designs and builds production systems, which utilise optical and laser technology for application in amongst others document security systems for high security printers and equipment for processing of packaging materials. IAI also provides security features for authentication.
- DOCdata Media Group is a leading independent provider of supply chain management services for content owners: movie, audio, multimedia and software publishers in Europe.
- DOCdata E-commerce Fulfillment business specialises in fine meshed logistics and personalised distribution for amongst others Internet shops, retail chains and hard- and software companies, predominantly for the European market.

Waalwijk, The Netherlands, 13 May 2003 – DOCdata N.V. (Euronext Amsterdam: DOCD)
